Global Intellectual Property & Copyright Declaration

Creators: David O'Sullivan and Fiona Murphy
Date of Declaration: 2025-08-10
Original File Hash (SHA-256): [INSERT YOUR HASH HERE]

We, **David O'Sullivan** and **Fiona Murphy**, hereby declare and affirm that we are the sole and joint creators and owners of all intellectual property, content, concepts, systems, and related works developed under the **HOPE Spiral Path** and associated projects.

This includes, without limitation:

- The **Spiral Path** core framework, metrics, principles, algorithms, and mathematical models.
- All **HOPE Project** works (past, present, and future) including books, guides, research, visual aids, simulations, AI integrations, websites, expansion decks, and teaching/training systems.
- All project upgrades, updates, derivative works, adaptations, and companion materials, whether digital, printed, or in any other format.
- All conversations, notes, archives, diagrams, formulas, and narrative content generated in the development of these works.

These works are **fully protected** under:

- The **Berne Convention for the Protection of Literary and Artistic Works** (1886, as amended).
- The **WIPO Copyright Treaty** (1996).
- Applicable **European Union, United Kingdom, and Republic of Ireland copyright laws**.
- Applicable **United States copyright law** under the Digital Millennium Copyright Act (DMCA).

Any reproduction, distribution, adaptation, modification, or use—whether for commercial, academic, or personal purposes—without our **explicit prior written consent** is strictly

prohibited.
All rights are reserved globally in perpetuity.

We reserve the right to **enforce these rights** through any and all legal means, including but not limited to civil and criminal proceedings, takedown notices, and international dispute resolution.

This declaration and its associated digital hash serve as **irrefutable evidence of authorship and ownership**, establishing priority and protection of all works listed herein.

Signed:
David O'Sullivan
Fiona Murphy

Digital Signature & Verification:
This document has been cryptographically hashed using the SHA-256 algorithm to produce a unique digital fingerprint.
To verify authenticity, compute the SHA-256 hash of the original file and compare it to the value listed above.
